We are grateful to the Motability Tenth Anniversary Trust for funding the research and publication of both this report for professional advisors to older and disabled drivers and its related consumer guidance.

RICA

RICA (Research Institute for Consumer Affairs) specialises in consumer research with older and disabled consumers. Founded through Consumers Association, publishers of Which?

RICA became independent in 1991. RICA has its own [Consumer Panel – the RicaWatch panel](#) – of over 600 people and is a disability led organisation. Ten of the charity's twelve Trustees have a disability. RICA carries out [commissioned research work](#) with industry, other charities, service providers and policy makers to improve products and services. With grant funding RICA also publishes free [consumer reports](#) based on independent research.

www.rica.org.uk

Introduction

In car safety technology is proven to increase motorist safety, improve driving comfort and helps keep older and disabled people driving for longer.

RICA has carried out desk research and consulted with motoring and disability experts to identify the technologies that are particularly helpful for older and disabled drivers, including people with reduced strength, dexterity, reaction time or hearing.

In this report we list these technologies and detail those that are available on a selection of popular cars. Vehicles were selected from those popular with Motability customers during 2015/16.

This report is aimed at professional advisors to older and disabled motorists. The findings of our research have also been published as consumer guidance at [www.rica.org.uk/in-car safety technology](http://www.rica.org.uk/in-car-safety-technology).

At a glance tables

Table 1 Which technologies can help older and disabled drivers?

Stage of Motoring	Technology	Description	Technology Type	Can help people with reduced...			
				Strength and Dexterity	Vision	Reactions	Hearing
At the beginning and end of your journey	Hill Start Assist	Prevents the car from rolling away when trying to pull away on an up or down gradient	Steering	✓			
	Parking Assistance	Allows the car to steer itself into a parking space with little input from the driver	Parking	✓			
Whilst driving	Information Systems	Technologies that provide the driver with additional information or which assist the driver in a particular tasks, eg satellite navigation systems, blind spot detection, pedestrian detection etc.	Assistance Information			✓	✓
	Braking Assistance	Technologies that may automatically brake the car in an emergency situation if the driver fails to respond	Braking	✓		✓	

Stage of Motoring	Technology	Description	Technology Type	Can help people with reduced...			
				Strength and Dexterity	Vision	Reactions	Hearing
Whilst driving	Assisted/Power Steering	Requires less effort from the driver to turn the steered wheels when driving at typical speeds and reduces the physical effort necessary to turn the wheels when a vehicle is stopped or moving slowly	Steering	✓			
	Lane Keep Assist	When changing lane the system monitors the areas to the left and right of the car and up to 50 meters behind it, warns you of potential hazards by means of flashing warning lights in the exterior mirrors	Steering	✓	✓		
	Lane Departure Warning	Used on major arterial routes, warns driver when the vehicle begins to move unintentionally out of its lane, some systems take control to stay in lane	Steering		✓		
	Speed/Cruise Control	This technology helps to avoid accidents by keeping the vehicle at a safe distance from the traffic ahead and/or by monitoring the local speed limit and adjusting the car's speed accordingly	Steering			✓	
	Driver Alert Systems	Monitors driver and alerts them when driver behaviour could cause risks, eg. driver drowsiness detection	Assistance Information			✓	
	Emergency situations	Emergency Assistance System	Alerts the emergency services in the event of an accident	Assistance Information			✓
